U.S. Permanent Resident, authorized to work for any U.S. employer without sponsorship

PROFESSIONAL SUMMARY

Senior cloud infrastructure and site reliability engineer with 15+ years in infrastructure: a decade of enterprise and telecom networking, then 6 years delivering cloud migrations, CI/CD, infrastructure as code and observability on Google Cloud and AWS. Founder of InfraScan AI (infrascanai.com), a multi-tenant SRE, cloud security and FinOps platform I designed, built and run on GKE Autopilot with Terraform, Argo CD and 13 Python microservices. Networking and audit depth (CCNA, BGP, OSPF, VPC segmentation, CIS benchmarks) that most cloud engineers learn on the job.

TECHNICAL SKILLS

Cloud Platforms: Google Cloud (GKE, Cloud Run, Compute Engine, Cloud SQL, Pub/Sub, BigQuery, Cloud Armor, Identity Platform, Secret Manager, Cloud KMS, VPC, IAM), AWS (EC2, ECS, S3, RDS, Lambda, IAM, CloudFormation, CloudWatch), Azure (Entra ID federation, Cost Management), FinOps

Infrastructure as Code & GitOps: Terraform (modules, remote state, drift detection, import), Argo CD, GitOps, Kustomize, Ansible

Kubernetes & Containers: Kubernetes, GKE, Docker, KEDA, HPA, PodDisruptionBudgets, NetworkPolicies, Kyverno, Pod Security Standards, External Secrets Operator

CI/CD & Supply Chain Security: GitHub Actions, Workload Identity Federation, cosign image signing, Trivy, SARIF / GitHub code scanning, pip-audit, npm audit, canary and progressive delivery

SRE & Observability: SLO/SLI, error budgets, multiwindow burn-rate alerting, Prometheus, Alertmanager, Grafana, Google Cloud Monitoring, Datadog, OpenTelemetry, incident response, on-call, PagerDuty, postmortems, root cause analysis, high availability, disaster recovery

Security & Networking: IAM least privilege, zero trust, STRIDE threat modeling, Prowler, CIS benchmarks, OWASP Top 10, WAF, MFA, secrets management; VPC design and segmentation, hybrid connectivity, VPN, load balancing, TLS, DNS, BGP, OSPF

Programming & Data: Python (FastAPI, SQLAlchemy, pytest), Bash, HCL, SQL, TypeScript (Next.js), PostgreSQL

WORK EXPERIENCE

Founder & Lead Cloud Engineer

09/2026 – Present

InfraScan AI (infrascanai.com) — *Bentonville, AR*

- Designed, built and launched infrascanai.com, a multi-tenant platform that automates SRE, cloud security and FinOps for U.S. small and mid-size businesses on GCP, AWS and Azure: 13 FastAPI microservices, a Next.js 15 portal and a KEDA-scaled scanner on GKE Autopilot.
- Wrote the Terraform for the whole Google Cloud footprint in dev and prod: private GKE Autopilot, Cloud SQL PostgreSQL 16 (private IP, PITR, database per service, regional HA), Pub/Sub with dead-letter topics, Secret Manager, Cloud KMS, Identity Platform with MFA and a global load balancer behind Cloud Armor.
- Built GitOps delivery with Argo CD and Kustomize and GitHub Actions pipelines that use keyless Workload Identity Federation, SHA-pinned actions, Trivy and dependency audits, and cosign signing; Kyverno admits only signed images from Artifact Registry.
- Engineered for self-healing and scale: transactional outbox to Pub/Sub with idempotent consumers, HPAs, PDBs and zone spreading, KEDA scaling scanner Jobs from 0 to 5 on queue depth, leader election via Postgres advisory locks, and a build check that keeps pod connection pools under Cloud SQL limits.
- Shipped customer SRE features: uptime checks every 30 s to 10 min via an SSRF-safe prober, SLOs with error budgets and multiwindow burn-rate alerts, Alertmanager and Cloud Monitoring intake with dedup, on-call rotations, escalation, PagerDuty/Slack/email paging and SEV1/SEV2 postmortems.
- Secured multi-tenant access: keyless read-only onboarding (GCP IAM, AWS OIDC role, Azure federated credentials) bound per tenant against confused-deputy access, workload-identity tokens with per-service caller allowlists instead of shared secrets, and default-deny NetworkPolicies.
- Covered it with 130+ pytest tests on real PostgreSQL, a cross-service end-to-end journey and Playwright/axe accessibility checks in CI; Prowler and Trivy findings are explained with the Claude API under deterministic checks, and billing runs on Stripe.

Expert Contributor, AI & Agentic Benchmarking (Contract)

01/2026 – 07/2026

Snorkel AI — *Remote*

- Authored 300+ benchmark tasks that test AI coding agents on real engineering work, including Terraform, GitHub Actions, Fluent Bit/OpenTelemetry, Go concurrency and Python debugging, plus ML research-replication scenarios.
- Built each task as an isolated, reproducible Docker environment with a reference solution and automated tests validated against grading pipelines, plus Python automation for repeatable runs.

Independent Consultant, Cloud Infrastructure, DevOps & Security
12/2020 – 10/2025

Self-employed (clients include COTES and AYA Consultores) — *Remote*

- Led on-premises-to-cloud migrations to Google Cloud and AWS for 3–4 concurrent clients in telecom, finance and technology, coordinating teams of 3–5 engineers per engagement and reducing operating cost through right-sizing and automation.
- Built GitHub Actions CI/CD and Terraform/Ansible GitOps workflows that automated 50–70% of manual deployment work and raised release frequency without losing stability; ran containerized workloads on Docker and Kubernetes.
- Lowered mean time to detect (MTTD) with monitoring, telemetry and alerting on Prometheus, Grafana and cloud-native tooling, including the infrastructure observability stack for AYA Consultores.
- Led an infrastructure and security audit for COTES, the telecommunications cooperative of Sucre, Bolivia; the findings exposed critical gaps and launched an internet-service expansion program that moved its data and service infrastructure to a hybrid, multi-platform architecture.

Sales Manager & Investor
02/2020 – 12/2020

CL Autocare — *Texas, USA*

Commercial Chief Officer
08/2017 – 02/2020

Next Level (Samsung Partner) — *La Paz, Bolivia*

- Owned the P&L for the Samsung B2B accessories business across 2 stores and 7 franchises, and led the digital transformation and a new e-commerce launch.

SRE Consultant
04/2016 – 01/2017

Financial Bureau of Investigations (government) — *La Paz, Bolivia*

- Owned monitoring and observability for the bureau's integrated network (telecommunications, data and security systems) and enforced access controls that met government compliance requirements.
- Sustained 99.8% availability with zero security breaches across 10+ mission-critical systems.
- Cut incident detection time by 55% by designing and deploying real-time network monitoring and alerting across critical infrastructure.

Technical Audit Consultant / Director
2012 – 2016

AYA Consultores — *La Paz, Bolivia*

- Led a technical audit division (2012–2014 and 2015–2016) delivering infrastructure and database audits aligned to SIAF government regulatory standards, and automated the reporting workflows.

Network Engineer
2014

Municipal Asphalt and Road Company — *La Paz, Bolivia*

Network Engineer
2010 – 2012

UPV SRL — *La Paz, Bolivia*

- Redesigned multi-site LAN/WAN and deployed DHCP and RADIUS for centralized device management with zero security incidents.

Network & Facilities Engineer
2006 – 2010

Andean Solar Energy — *La Paz, Bolivia*

- Built and maintained network and solar-powered telecommunications systems across 15+ remote off-grid sites.

OPEN SOURCE & PROJECTS

- **tfminder (Python, MCP, on PyPI):** MCP server that lets AI agents plan Terraform but applies only the exact human-approved plan, after a declared scope and policy decision; the agent never holds cloud credentials.
- **pyrrho and strayform (Python, on PyPI):** pyrrho reviews Terraform plans against prior state for destroys, public exposure and privilege escalation (35 rules, SARIF, GitHub Action; 98% detection vs. 61% for Checkov on the same corpus); strayform finds GCP drift and ClickOps and generates import blocks.
- **Upstream contribution:** PR #19140 to GoogleCloudPlatform/magic-modules, the generator behind terraform-provider-google.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Telecommunications Engineering – Universidad Privada del Valle, La Paz, Bolivia **2004 – 2008**

Certifications: Cisco Certified Network Associate (CCNA), 2012 · Huawei HCIA – 5G Network V2.0

Training: Google Cloud Skills Boost (Cloud Engineer, DevOps/SRE, Cloud Digital Leader paths) · TCS Cybersecurity Analyst simulation

Languages: English (professional working proficiency) · Spanish (native)
